

CODE REFINERY

WORKSHOP

DEC 12-14 2017, 09:00—17:00

U9 LECTURE HALL, MAIN BUILDING
AALTO UNIV., OTAKAARI 1, ESPOO

WHO IS IT FOR

If you are writing code that is used in research, then this workshop is for you.

GOALS

The aim of this workshop is to demonstrate to and familiarize the participants with best practices and tools in modern research software development. The main focus is on professional tools for efficiently developing and maintaining research software. Since research code is often developed in a collaborative setting, we will discuss tools and workflows which facilitate this process.

FORMAT

Hands-on informal and interactive three-day event with type-along format of presentations, demos and live coding. Short tutorials alternating with practical exercises.
